

### Oolite "Thargoid Warship"

Model Design by Ian Bell and David Braben

Texture by Giles "Aegidian" Williams

Paper Model Mesh by Dave "Selezen" Hughes

All folds are Mountain folds.

No numbered tabs here, since the shape is symmetrical.

Score the side panels and glue the arrowed tab first. Fold the tabs towards the centre of the ship so they are horizontal. The small octagon goes on top and the big one goes on the bottom.
